DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 4-11, 15, and 18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In line 2 of claim 4 "shaft" should be deleted.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 12 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Thompson (3,400,696). Thompson shows everything except specifically stating that the engine is a four cycle engine, and that it includes both intake and exhaust valves. The examiner believes that it would be obvious, if not inherent, that the engine would be a four cycle engine, since this is the most common and conventional engine, and that it would include both intake and exhaust valves, in order to function.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Art Unit: 3747

Claims 4 and 5 rejected under 35 U.S.C. 103(a) as being unpatentable over Thompson (3,400,696) in view of Nomura et al (6,453,861). Thompson shows everything except the rocker arm having a pair of forked ends extending around a plug tube of the ignition plug, and a cam cap securing the rocker arm shaft, wherein the rocker arm shaft is secured by a bolt fastening the cam cap in a rocker arm shaft holder. Nomura et al teach that it is old in the art to provide a rocker arm having a pair of forked ends 31 extending around a plug tube of the ignition plug, and a cam cap 25 securing the rocker arm shaft, wherein the rocker arm shaft is secured by a bolt fastening the cam cap in a rocker arm shaft holder (see column 3, lines 1-10, 20-25, and 27-31). It would have been obvious to one having ordinary skill in the art to employ the rocker arm having a pair of forked ends extending around a plug tube of the ignition plug, and a cam cap securing the rocker arm shaft, wherein the rocker arm shaft is secured by a bolt fastening the cam cap in a rocker arm shaft holder, in order to accommodate both the intake and exhaust valves without adding unnecessary weight and complexity, and to secure the rocker, respectively.

Allowable Subject Matter

Claims 2, 3, 8, 9, 13, 14, 16, and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 6-11, 15, and 18 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marguerite J. McMahon whose telephone number is 703-308-1956. The examiner can normally be reached on flex.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yuen Henry can be reached on 703-308-1946. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
